PROJECT DESIGN PHASE-I
SOLUTION ARCHITECTURE

Date	16 October 2022
Team ID	PNT2022TMID38250
Project Name	Personal Assistance for Seniors Who Are Self-Reliant.
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Old people who need to take medicines have a reminder and self-assistant to avoid the skipping of medicine
- It helps in decreasing medication dispensing errors and wrong dosages
- It is used to organize your medication doses for a certain length of time and reminds the medication time through alarm and vibrations
